- **Web Design:** HTML, CSS
- **Database:** MySQL,MongoDB,Postgres
- **Operating System:** Windows,Linux

Soft Skills

- Strong Communication
- Leadership
- Teamwork
- Time Management
- Adaptability
- Problem Solving

PROJECTS

Software Engineering Project: Inventory Management System (IMS)

- Designed and planned a new warehouse management system for Global Tech Corporation.
- Created Gantt charts, WBS, use case diagrams, communication diagrams, and activity diagrams.
- Developed features like sales, purchase orders, user access, reports.

Eco - Sangraha

- Eco-Sangraha is a website interface for students and college clubs to exchange reusable paper and event materials.
- Built a responsive MERN Stack web application within a 48-hour hackathon, utilizing React.js for the frontend, Node.js and Express.js for the backend, and MongoDB for data management.

SmartShelf – MERN Stack eBook Platform

- Built a full-stack web application using MongoDB, Express.js, React.js, and Node.js
- Developed an in-browser eBook reader with highlighting, bookmarks, and TTS (text-to-speech)
- Implemented auto-scroll, manual scroll tracking, and reading progress monitoring
- Added subscription-based access control for users (free and paid plans)

- Built a dynamic admin dashboard to manage books, users, and subscription limits
- Enabled real-time notifications for subscription changes and access restrictions
- Developed personalized book recommendation system based on user activity

CERTIFICATIONS

- AWS Academy Cloud Foundations
- AWS Academy Data Engineering
- AWS Academy Machine Learning Foundations
- AWS Academy Machine Learning for Natural Language Processing
- Kathmandu University Hack for Business
